International Conference & Exhibition on

Seals & Gaskets

Excellence and Advances in Seals & Gaskets

17-18 (Mon-Tue) October 2011, Hotel Sun-n-Sand, Pune

Exhibition Appeal

We have great pleasure in announcing, an International Conference on "Excellence and Advances in Seals & Gaskets". The event is first on the subject in India and is organized at Pune which is now a very major centre of many top class engineering and automotive companies.

The conference is accompanied by a modest exhibition. This presents an excellent opportunity to showcase your expertise and products to delegates and visitors.

We, therefore, appeal to you to participate as an Exhibitor in the event. As there are limited number of stalls, we request you to make your decision early and confirm participation by booking a stall of your choice.

The exhibition layout and tariff details are as under and space booking form is available on the other pages.

Conference

Invitation to Participants

Seals & Gaskets are critical components of all machinery in the modern world, and their applications are manifold, ranging from the humble human pedal powered cycle to space craft. Materials used to make the seals & gaskets vary from simple paper to fibres, elastomers, graphite, metals, ceramics, coatings etc. They are used in all the applications where it is required to isolate the system from the universe for its proper functioning and achieving the desired process with efficiency and non-contamination.

The selection of the right materials, design, manufacturing processes, installation and maintenance, assembling, performance testing, etc play vital roles in producing the right quality and kind of seal or gasket for a particular application so as to have protection of components and their damage from various types of surroundings.

Highly advanced technologies had been showcased at the last Hannover fair in Germany on seals & gaskets and this has motivated us to bring about awareness on Excellence and Advances in Seals & Gaskets. However, the subject has rarely been discussed exclusively in a forum in India.

This seminar will bring together on one platform - the technocrats, manufacturers, suppliers, purchasers, designers, and end users involved. It will be our endeavour to address the related problems and the failures to meet end user requirements, and to promote the development of quality products with zero defect manufacturing and cost effective solutions through innovative technologies.

With these views a two day International Conference on "Excellence and Advances in Seals and Gaskets" is organized on 17th - 18th October 2011 in Pune.
